Multi-Channel Distortion

Subvert is a Savage 3-Channel Distortion Processor Designed to Decimate the Frequency Spectrum

Based around 5 effects; multimode distortion, FM ring modulator, digitizer, metalizer and multimode filter, Subvert generates anything from subtle harmonics to relentlessly brutal distortions. Offering three parallel channels of each effects chain as well as a wealth of modulation and routing options, Subvert is our take on signal decimation with a twist.

Subvert's multi-channel layout and per-effect bypass option make it possible to reconfigure the order of effects in each chain in a variety of creative ways. Between the unconventional routing options, 15 effects processors, global EQ, numerous modulation options and global randomizer, Subvert makes it possible to achieve mind-bending destructive effects.

Thank you so much for this!! Clearing misconceptions and how to organize and optimize my storage to the best efficient possible. Im doing music production and some vst and plugins will take space so if i can save them and operate them from there will be a huge plus for me. What do you think is best? Thanks!

Yeah, I would say your libraries/media is a great place to store and run these from the external SSD. The plugins will definitely be dependent on each one as to whether they need to be installed on the internal where the software is, however all that media that's generated should be just fine on the external.

I rely on these heavily as a creator and run quite a bit off of them.

Comments on "THE BEST KEYSCAPE PRESETS!! THIS VST's IS AMAZING!!"

J.M. Lopez 1 day ago (edited)

Hey man, love your vids as always great info, input and encouragement. I made a instrumental vid and loaded it this week. Nothing crazy but felt like i climbed a mountain and got a step closet to being a better producer. Thanks for this vst review and your encouraging words. I dont know how i passed this by but will have to look deeper into Keyscape, seems super versatile! Much love!!

P.S. I changed my avatar but hope you remember me :)

Idk who needs to hear this today but, make the music that YOU want to make. Don't fall into the trap of trying to impress your peers because ultimately passion is what shines through in your music. There is no right or wrong way to do what we do only different flavors.

Bioscape, Found Sound Cinematics

Field recordings merge together in a sonic kaleidoscope of found sound cinematics – from underscoring pads to drones, pulses and textures.

Bioscape is a 4.9GB Kontakt instrument that is based on field recordings and found sounds to create musical content, this gives you an unpolished, raw and organic dimension to your production.

Bioscape is particularly suitable for game and filmscore composers, but works extremely well with ambient music, music concrète, sound healing, music therapy or as a standalone experimental instrument.

Bioscape contains hundreds of field recordings and found sounds from hydrophonic desert wind to abandoned factory drones, from ghostly ringing rocks to cracking icy rivers, all sorted in different sound categories. Using the sound material, a team of world renowned sound designers have crafted over 440 presets sorted in categories from pulses to pads, textures, ASMR, drones, playables, effects and reverse.

Within the DNA of Bioscape is a multifaceted instrument that on one side can sound as atonal and dark as you want and on the other side produce the most ethereal and light timbres.

Bioscape is made for and licensed to the free Kontakt Player so you do not need the full version of Kontakt to play Bioscape. It is fully NKS compatible and supports drag & drop, so you can use your own sounds and samples. It is installed directly in Native Access, just enter the serial number and click install.

Gombulator by Fine Cut Bodies

Link: *Gombulator by Fine Cut Bodies*

One of the free Kontakt libraries we are most in love with, due to its particular sound and uniqueness.

Gombulator is a free Kontakt instrument based on a rare portable synth from the early '80s. The Yamaha PSR-15 has six preset sounds plus a set of drums, all of which were meticulously sampled before arranging them into the twisted interface of Gombulator.

The interface looks like a simple image at first but both the moon and the water allow you to interact with the sound.

#1 songwriting tip

Less is more. Singing or rapping, doesn't matter.

Let the beat breathe. Watch less tutorials, study the greatest to ever do it.

Here's Kendal - another babeshow babe 😀 She turned out not to be ticklish on her feet at all, and in fact didn't seem even remotely ticklish to begin with so thought we might have to give up and see it as a write-off. Kendal insisted she was ticklish though and so I persisted...and then found the spot! She just needs to be tickled hard on the body and then she goes from 0-100 instantly! She has epic boobs as well...

Bioscape, Found Sound Cinematics

Field recordings merge together in a sonic kaleidoscope of found sound cinematics – from underscoring pads to drones, pulses and textures.

Bioscape is a 4.5GB Kontakt instrument that is based on field recordings and found sounds to create musical content, this gives you an unpolished, raw and organic dimension to your production.

Bioscape is particularly suitable for game and filmscore composers, but works extremely well with ambient music, music concrète, sound healing, music therapy or as a standalone experimental instrument.

Bioscape contains hundreds of field recordings and found sounds from hydrophonic desert wind to abandoned factory drones, from ghostly ringing rocks to cracking icy rivers, all sorted in different sound categories. Using the sound material, a team of world renowned sound designers have crafted over 440 presets sorted in categories from pulses to pads, textures, ASMR, drones, playables, effects and reverse.

Within the DNA of Bioscape is a multifaceted instrument that on one side can sound as atonal and dark as you want and on the other side produce the most ethereal and light timbres.

Bioscape is made for and licensed to the free Kontakt Player so you do not need the full version of Kontakt to play Bioscape. It is fully NKS compatible and supports drag & drop, so you can use your own sounds and samples. It is installed directly in Native Access, just enter the serial number and click install.

WHY SERUM?

The dream synthesizer did not seem to exist: a wavetable synthesizer with a truly high-quality sound, visual and creative workflow-oriented interface to make creating and altering sounds fun instead of tedious, and the ability to "go deep" when desired - to create / import / edit / morph wavetables, and manipulate these on playback in real-time.

Bioscape, Found Sound Cinematics

Field recordings merge together in a sonic kaleidoscope of found sound cinematics – from underscoring pads to drones, pulses and textures.

Bioscape is a 4.5GB Kontakt instrument that is based on field recordings and found sounds to create musical content, this gives you an unpolished, raw and organic dimension to your production.

Bioscape is particularly suitable for game and filmscore composers, but works extremely well with ambient music, music concréte, sound healing, music therapy or as a standalone experimental instrument.

Bioscape contains hundreds of field recordings and found sounds from hydrophonic desert wind to abandoned factory drones, from ghostly ringing rocks to cracking icy rivers, all sorted in different sound categories. Using the sound material, a team of world renowned sound designers have crafted over 440 presets sorted in categories from pulses to pads, textures, ASMR, drones, playables, effects and reverse.

Within the DNA of Bioscape is a multifaceted instrument that on one side can sound as atonal and dark as you want and on the other side produce the most ethereal and light timbres.

Bioscape is made for and licensed to the free Kontakt Player so you do not need the full version of Kontakt to play Bioscape. It is fully NKS compatible and supports drag & drop, so you can use your own sounds and samples. It is installed directly in Native Access, just enter the serial number and click install.

- **Composite Depth** controls how a layer's image data interacts with depth information on the canvas and other layers.

For example, if the canvas contains impasto brushstrokes, the **Composite Depth** setting determines what happens when these brushstrokes intersect with brushstrokes on the layer. For more information, see Blending impasto with other layers.

You can set a different composite method for every layer in a document. Keep in mind the role of the underlying image in creating an effect — you might achieve an unexpected result if the underlying image is solid black or white.

The best way to understand the different composite methods is by seeing them in action. Quickly cycle through a layer's composite methods to create new and interesting versions of your image. For a comparison of Corel Painter composite methods and Adobe Photoshop blend modes, see Importing and exporting layers.

The available composite methods are described in the following table:

Composite method	Example
Default Allows the layer to cover and hide the underlying image.	
Gel Tints the underlying image with the layer's color. For example, a yellow layer gives the underlying image a yellow cast. Corel Painter automatically sets a layer's composite method to **Gel** if you paint on it with a brush that uses the **Buildup** method.

Basically, all fears can be summed up simply

Fear of Man

"Stop trusting in mere humans, who have but a breath in their nostrils. Why hold them in esteem?"

CALLING > FEAR

Then Jesus came to them and said, "All authority in heaven and on earth has been given to me. Therefore go and make disciples of all nations, baptizing them in the name of the Father and of the Son and of the Holy Spirit, and teaching them to obey everything I have commanded you. And surely I am with you always, to the very end of the age."

(Matthew 29:16-20)

*"One night the Lord spoke to Paul in a vision: "**Do not be afraid; keep on speaking, do not be silent.** For I am with you, and no one is going to attack and harm you, because I have many people in this city." So Paul stayed in Corinth for a year and a half, teaching them the word of God."*

LOVE > FEAR

"Jesus went through all the towns and villages, teaching in their synagogues, proclaiming the good news of the kingdom and healing every disease and sickness. When he saw the crowds, he had **compassion on them**, because they were harassed and helpless, like sheep without a shepherd. Then he said to his disciples, "The harvest is plentiful but the workers are few. Ask the Lord of the harvest, therefore, to send out workers into his harvest field."

(Matthew 9:35-38)

There is no fear in love. But perfect love drives out fear because fear has to do with punishment. The one who fears is not made perfect in love (1 John 4:18).

HOLY SPIRIT > FEAR

When Jesus was warning His disciples about the trials they would experience, He told them, "When you are brought before synagogues, rulers and authorities, do not worry about how you will defend yourselves or what you will say, for the Holy Spirit will teach you at that time what you should say" (Luke 12:11-12).

Create a folder on the secondary drive. You can add new the plugins to that folder.
Open the FL plugin manager and click on the icon of the folder with a plus in the "plugin search paths" tab.
Select the folder you had installed the plugins on the SECONDARY drive. Once you've done this, your selected folder will show up at the the "plugin search paths" tab, and finally, click on "Find Plugins".
Sorry if anything went wrong, but I've tested it, and it worked! Hopefully it works for you too :)

☐ **PRAY IT:** Read and pray through **James 1:1-8.**

☐ **PONDER IT:** *Food For Thought*

double-minded man (v.8)—a literal translation of the Greek expression that denotes having one's mind or soul divided between God and the world; this man is a hypocrite, who occasionally believes in God but fails to trust Him when trials come and thus receives nothing; the use of this expression in James 4:8 makes it clear that it refers to an unbeliever

☐ **PROBE IT:** *Take Time To Reflect and Journal*

1.) According to James, how should believers respond to trials?
2.) What does it mean to be double-minded? Give an example, if you can.
3.) How do you tend to respond when you go through trials?
4.) How has God matured you through trials? What have they produced in you?

☐ **PARTNER IT:** *Small Group Relationships*

Share with someone in your small group, your most challenging trial in the last year and how God is presently maturing your faith and trust in Him.

☐ **PROCLAIM IT:** *Placed for a Purpose*

Ask one of your neighbors, "How have the trials of 2020 changed their view on the world?". Then share with them how God has used trials to help mature you.

If you sleep today and wake up in 2050,

what will be the first thing you will google?

FEATURES

Premium 7-string virtual instrument

- **High-quality A/D** conversion and **ultra-low noise** level.
- **4 Years** of recording and engineering to bring you **unrivaled** samples.
- 10000+ samples, **24-bit 48khz**, 10GB in total.
- Individual samples for **infinite sustain** to freely adjust decay rate.

Fully equipped effects rack

- What is the first thing to do when one starts a virtual guitar? Usually it is to bypass all built-in effects, as they are mostly too primitive for any serious work. However, the effect rack we provide to you is **complete** and of **production-level quality**, not just a toy!
- Clean samples + Effect rack = **Complete electric guitar solution**
- **Effect Rack can be used alone on an audio track, with third-party instruments or even with a real guitar!**
- **31 effect modules** including: Screamer, EQ12, AMP, Flanger, Wah, Ping-Pong delay, etc.
- **16 AMPs** with styles from heavy metal to clean. 2x - 8x sample rate processing.
- **66 cabinet** IRs, up to four at once with **adjustable delay, volume and phasing**.
- **200 factory presets**, along with a **preset manager** to store your own presets.

My dude, you progressed so much from last year, hard work, working with different artist, even the effort inkeep your raps clean most the time is amazing. Never stop, look ahead and stay consistent. Wanted to give you Rose's dude! 👍👍🔥🔥
You got this!

There was something about older drum machines and synths that made them sound punchier and more pleasing than today's clinically perfect sounds.

That Thing is a multi-effects processor that has been designed to get you 'That Thing' missing from digitally perfect tracks today. It features a beautiful wide and deep chorus section great to thicken anything from synths, vocals, bass, pads drums and other sounds. The soundscape generator features samples of old vinyl players, tape machines, old radio, tube gear, atmospheres, ambiances etc – you can even add your own!

Features

- Chorus FX: Analog Modelled Chorus for wide, thick and rich sounds
- Soundscape Generator: Use our present samples of Vinyl, Tape, Tube, and Nature, or sample your own and use them!
- Filters HP/LP: Analog Modelled Low-Cut and High-Cut Filters provide further sound shaping
- Bit Crusher: Emulate Vintage Drum Machines and Samplers with the bit-crush feature, to induce more grit into the sound
- Now includes 'Dark Atmo' texture bank

We've deconstructed the orchestra—rebuilding it from the ground up to push the bounds of power, creativity, and aggression in modern scoring. Thrilling traditional combinations. Visceral sound design. And the gnarliest Braams you've ever heard.

Super Dragon Machine Dolzark

ARMORED DRAGON / EARTH DRAGON

illus. Atsushi Kawasaki

CREATURE

- *(This creature is put into your mana zone tapped.)*
- Whenever one of your other creatures that has Dragon in its race attacks, you may choose one of your opponent's creatures in the battle zone that has power 5000 or less and put it into his mana zone.
- Double breaker *(This creature breaks 2 shields.)*

Fateful encounter brought them a death battle. Fateful reunion ended their war.

For this is God's will, your sanctification: that you abstain from sexual immorality, so that each of you knows how to control his own body in sanctification and honor, not with lustful desires, like the Gentiles who don't know God. This means one must not transgress against and defraud his brother in this matter, because the Lord is an avenger of all these offenses, as we also previously told and warned you. For God has not called us to impurity but to sanctification. Therefore, the person who rejects this does not reject man, but God, who also gives you His Holy Spirit. (1 Thessalonians 4:3–8, HCSB)

He has the normal powers of well Wolverine but he also has the Phoenix force behind him.
Powers include-

- **Nigh Omnipotence:** The Phoenix Force is practically omnipotent, but is limited in undetermined and undefined ways as seems to suit its current mission/purpose.
- **Future Life-Force Tap:** The Phoenix Force can tap into the energy provided by life-force reserved for future generations, thus denying them existence.
- **Concussive Force Blasts:** It can wield this energy to project beams of immense concussive force powerful enough to destroy whole planetary bodies.
- **Energy Absorption:** It can directly absorb, manipulate, and fully control *any* type of energy such as Cyclops' ruby-red-colored optic blasts or the entire energy of a star, black hole, or even a whole galaxy.
- **Matter Transmutation:** It can manipulate and transmute matter on a sub-atomic level (e.g., turning wood to gold, stone to crystal, cause physical bodies to disintegrate by altering their molecular structure, etc).
- **Cosmic Teleportation:** It can teleport others across vast distances such as another planet or galaxy, and the vast vacuum of space itself or even an entire timeline all-together.
- **Resurrection Force:** It can resurrect anyone it wishes with its near infinite powers, as it is the embodiment of life and death itself. It could also bring itself back as well as its host.
- **Immortality:** Force is immortal and indestructible. It can't die or be destroyed. After its "death" in Avengers vs. X-Men, it was said to be destroyed, but, as it has happened many times, the entity never truly died.
- **Atmokinesis:** The Phoenix Force is capable of manipulating and creating cosmic weather . It can create cosmic storms, solar flares, geomagnetic storms, cosmic rays , coronal mass ejection and black holes.

He is easily the most powerful version of Wolverine there is, he woudl have killed Thor if the Phoenix Force hadn't stopped him.

One of the more gruesome ways the Hulk has been taken down has to be by the hand of Wolverine, arguably one of the most popular mutants of all the X-Men characters. In an alternate reality, a dystopian future sees the Hulk driven to evil. He sends his minions to destroy the small family Logan created in the desolate wastelands.

In anger, Logan challenged the Hulk one-on-one and was eaten. Being the resourceful type, however, Wolverine regenerated inside of the Hulk's stomach and clawed his way out, taking the Hulk out once and for all.

Imbued with the Power Cosmic thanks to Galactus, the Silver Surfer has more power than can ever be accounted for. During the *Tales to Astonish #93* storyline, the Hulk becomes enraged with the Surfer when the galactic hero is unable to take the Hulk away from Earth to be left alone.

The Hulk attacks, but is easily knocked unconscious by the Power Cosmic unleashed by the Surfer. Had the Hulk waited, he would have gotten his wish sooner or later.

Superman

Probably the most powerful hero to ever defeat the Hulk, it's none other than Superman himself. The DC Comics hero is undoubtedly one of the strongest superheroes of all time, and in 1996, Marvel and DC Comics decided to see once and for all who would win in a fight between these two titans.

In *Marvel Comics vs. DC*, the heroes from each universe are pitted against each other to see which universe survives and which gets erased. Superman is able to unleash his full power and not hold back like he usually does, making him victorious.

METAL FOR THE MASSES.

Drum MIDI inspired by the last two decades of metal.

In today's fragmented world of metal, the lines between genres have blurred to a point where often several styles seamlessly meld into one. Any random track can feature anything from a regular four-on-the-floor or a subtle fusion- and jazz-inspired groove to the most relentless d-beats, blasts and grind variations, without the average listener even blinking twice. In this MIDI pack, drummer powerhouse **Ash Pearson** (Revocation, 3 Inches of Blood) dives headfirst into not only his own impressive discography but also the past two decades of metal music, bands and personal inspirations, to unravel the art of metal drums in the new millennium.

FEATURE SPOTLIGHT

- Drum grooves and fills primarily inspired by metal of the past two decades
- Suitable for anything from heavy metal to technical death, thrash and progressive metal
- Performed by Ash Pearson (Revocation, Zimmers Hole, 3 Inches of Blood)
- More than 400 individually played files

jml1218 asked:

Hello Mark, been a minute since i messaged you but today is my birthday!! Can i get trivia on Ashiok design origins? Thanks!!

In earlier versions of the story, Ashiok was going to launch a war by attacking Theros with their own dreams, but that went away as we started building the pantheon of Gods and decided to have Heliod play a larger role.

Happy Birthday!

Emotional Healing

1 Peter 5:10 ESV / 718 helpful votes

And after you have suffered a little while, the God of all grace, who has called you to his eternal glory in Christ, will himself restore, confirm, strengthen, and establish you.

Psalm 34:17-20 ESV / 710 helpful votes

When the righteous cry for help, the LORD hears and delivers them out of all their troubles. The LORD is near to the brokenhearted and saves the crushed in spirit. Many are the afflictions of the righteous, but the LORD delivers him out of them all. He keeps all his bones; not one of them is broken.

Psalm 147:3 ESV / 606 helpful votes

He heals the brokenhearted and binds up their wounds.

John 14:27 ESV / 440 helpful votes

Peace I leave with you; my peace I give to you. Not as the world gives do I give to you. Let not your hearts be troubled, neither let them be afraid.

1 Corinthians 9:19-23
New International Version

Paul's Use of His Freedom

19 Though I am free[A] and belong to no one, I
have made myself a slave to everyone,[B] to win
as many as possible.[C] 20 To the Jews I became
like a Jew, to win the Jews.[D] To those under
the law I became like one under the law
(though I myself am not under the law),[E] so as
to win those under the law. 21 To those not
having the law I became like one not having the
law[E] (though I am not free from God's law but
am under Christ's law),[G] so as to win those not
having the law. 22 To the weak I became weak,
to win the weak.[H] I have become all things to
all people[I] so that by all possible means I
might save some.[J] 23 I do all this for the sake
of the gospel, that I may share in its blessings.

2 Corinthians 12 NIV ...
From biblegateway.com – delive

knows.[F] 3 And I know that this man—whether
in the body or apart from the body I do not
know, but God knows— 4 was caught up[G] to
paradise[H] and heard inexpressible things,
things that no one is permitted to tell. 5 I will
boast about a man like that, but I will not boast
about myself, except about my weaknesses.[I]
6 Even if I should choose to boast,[J] I would not
be a fool,[K] because I would be speaking the
truth. But I refrain, so no one will think more of
me than is warranted by what I do or say, 7 or
because of these surpassingly great
revelations.[L] Therefore, in order to keep me
from becoming conceited, I was given a thorn
in my flesh,[M] a messenger of Satan,[N] to
torment me. 8 Three times I pleaded with the
Lord to take it away from me.[O] 9 But he said to
me, "My grace[P] is sufficient for you, for my
power[Q] is made perfect in weakness."[R][S]
Therefore I will boast all the more gladly about
my weaknesses, so that Christ's power may
rest on me. 10 That is why, for Christ's sake, I
delight[T] in weaknesses, in insults, in hardships,
[U] in persecutions,[V] in difficulties. For when I
am weak, then I am strong.[W]

All five did work in Bleach's 1000 Year Blood War Arc. But by the end of the arc who came out the strongest?

26 Because of this, God gave them over to shameful lusts. Even their women exchanged natural sexual relations for unnatural ones. 27 In the same way the men also abandoned natural relations with women and were inflamed with lust for one another. Men committed shameful acts with other men, and received in themselves the due penalty for their error.

28 Furthermore, just as they did not think it worthwhile to retain the knowledge of God, so God gave them over to a depraved mind, so that they do what ought not to be done. 29 They have become filled with every kind of wickedness, evil, greed and depravity. They are full of envy, murder, strife, deceit and malice. They are gossips, 30 slanderers, God-haters, insolent, arrogant and boastful; they invent ways of doing evil; they disobey their parents; 31 they have no understanding, no fidelity, no love, no mercy. 32 Although they know God's righteous decree that those who do such things deserve death, they not only continue to do these very things but also approve of those who practice them.

For we ourselves were once foolish, disobedient, led astray, slaves to various passions and pleasures, passing our days in malice and envy, hated by men and hating one another; 3

but when the goodness and loving kindness of God our Savior appeared, 4

he saved us, not because of deeds done by us in righteousness, but in virtue of his own mercy, by the washing of regeneration and renewal in the Holy Spirit, 5

which he poured out upon us richly through Jesus Christ our Savior, 6

so that we might be justified by his grace and become heirs in hope of eternal life. 7

The saying is sure. I desire you to insist on these things, so that those who have believed in God may be careful to apply themselves to good deeds; these are excellent and profitable to men. 8

But avoid stupid controversies, genealogies, dissensions, and quarrels over the law, for they are unprofitable and futile. 9

The LORD is merciful and gracious, slow to anger and abounding in steadfast love. 8

He will not always chide, nor will he keep his anger for ever. 9

He does not deal with us according to our sins, nor requite us according to our iniquities. 10

Blessed be the God and Father of our Lord Jesus Christ, the Father of mercies and God of all comfort, 3

who comforts us in all our affliction, so that we may be able to comfort those who are in any affliction, with the comfort with which we ourselves are comforted by God. 4

For as we share abundantly in Christ's sufferings, so through Christ we share abundantly in comfort too. 5

If we are afflicted, it is for your comfort and salvation; and if we are comforted, it is for your comfort, which you experience when you patiently endure the same sufferings that we suffer. 6

Our hope for you is unshaken; for we know that as you share in our sufferings, you will also share in our comfort. 7

For we do not want you to be ignorant, brethren, of the affliction we experienced in Asia; for we were so utterly, unbearably crushed that we despaired of life itself. 8

Why, we felt that we had received the sentence of death; but that was to make us rely not on ourselves but on God who raises the dead; 9

he has realized in Christ Jesus our Lord,

in whom we have boldness and confidence of 12
access through our faith in him.

So I ask you not to lose heart over what I am 13
suffering for you, which is your glory.

For this reason I bow my knees before the Father, 14

from whom every family in heaven and on earth is 15
named,

that according to the riches of his glory he may 16
grant you to be strengthened with might through
his Spirit in the inner man,

and that Christ may dwell in your hearts through 17
faith; that you, being rooted and grounded in love,

may have power to comprehend with all the saints 18
what is the breadth and length and height and
depth,

and to know the love of Christ which surpasses 19
knowledge, that you may be filled with all the
fulness of God.

Now to him who by the power at work within us 20
is able to do far more abundantly than all that we
ask or think,

to him be glory in the church and in Christ Jesus 21
to all generations, for ever and ever. Amen.

"My Father's house has many rooms; if that were not so, would I have told you that I am going there to prepare a place for you? And if I go and prepare a place for you, I will come back and take you to be with me that you also may be where I am."

After this I looked, and there before me was a great multitude that no one could count, from every nation, tribe, people and language, standing before the throne and before the Lamb. They were wearing white robes and were holding palm branches in their hands. And they cried out in a loud voice:

How to Import and Export Audio in FL Studio

Article #1760874 | Updated on Feb 3, 2021

Getting started

In this guide, we will show you how to import, edit, and export audio files using FL Studio. It's very easy to do, so follow the sections below to get started.

1. Import audio
   - Drag and drop
   - Create an audio clip
   - Import audio into Edison

Import audio

You have the ability to import many different types of audio files: **.AIFF**, **.DS**, **.DWP**, **.FLAC**, **.MP3**, **.OGG**, **.SF2**, **.Speech**, **.SYN**, **.XI**, and **.WAV.** There are multiple ways you can import them, as well. Depending on what you plan on doing with the audio, you may choose one option over the other, but it's easy no matter which way you do it.

Drag and drop

Except for Fruity Edition, you can drag and drop audio from *File Explorer (PC)* or *Finder (Mac)* directly into the *Playlist*. Once on the Playlist, it will create an audio track on the *Channel Rack*. You can also drag and drop audio files from the *Browser* window, as well. The drag and drop method is best for when you want to add a longer audio file to the Playlist, such as a drone sound or a song that you want to remix.

You can also drag and drop audio files from the *Browser* window, as well. The drag and drop method is best for when you want to add a longer audio file to the Playlist, such as a drone sound or a song that you want to remix.

Create an audio clip

Another option to import audio is to create an empty Audio Clip channel and importing it through the *Audio Clip Settings* window. Using this option is great for when you want to create a rhythm like a hi-hat pattern, or using a one-shot sample like a bass drop or crash cymbal.

1. Click **Add** in the top bar and then select *Audio Clip* located in the **Misc** section.
2. In the *Audio Clip Settings* window, click the **Folder** icon, locate the audio file, and then click **Open**.

Quick thought especially for new artists. I never use view count as a measure for success. I put my focus on watch time. You can't control who clicks your video but how long they stay is completely up to you. Focus on good content and the rest will come.

I feel like if you want to invest, investing in art and antiques and cars and stuff could be far more rewarding than crypto.
The risk and reward are both lower; but you get to have cool art and antiques and cars

Desperately need to remove...
Q: Desperately need to remove Catalina and reinstall Mojave

I used for work are not compatible.
I've read everyone's posts and tried to put together all the steps and tips. But before I embark on this quest, I'd like to triple check that I got this right:

- First of all, I have a Time Machine Backup pre-Catalina on an external hard drive, and also a new backup made from Catalina which exlcludes the Apps and the System folders, just in case
- Then I have created the bootable installer onto an external device (in my case I'm using the same external hard drive where my back up is, which I have partitioned and formatted so it's a Mac OS Extended Journal format).
- At this point, I need to restart the machine in recovery mode
- Open Disk Utility
- Erase Macintosh HD and Macintosh HD - Data after changing their format to Mac OS Extended Journal by clicking on "-"
- Then select the new installer and click '+' to rename it as Macintosh HD
- Go back to restore from Time Machine

I hope I got the process right. Please let me know if

For me it's like this music is a career for people. If they go the route of trying to appeal to the majority. I can't really blame them, the fans dictate the sound that moves and makes the airwaves. Ppl can't complain about things they partake in or accept

It turned out to be a mismatch in port number between FL-Studio MIDI setting and Plugin Wrapper Settings MIDI setting.
SOLUTION:
Assign a port number to the MIDI controller (FL-Studio >> Options >> MIDI >> Input).
Assign the same port to MIDI in the wrapper, *"top-left > plug with gear icon "* (Plugin Wrapper Settings >> MIDI).
Done!

I know sometime around or after the end of last year, it has been an iptic but from what I heard the reason why folks were swearing was due to YT algorithms and etc.
Not sure how much is true but I notice more rappers cursing more and even the "n-word" being used more(1/2)

I actually liked Shannon's take on why Baker played well. I do disagree that OBJ is a non-factor because the evidence is there, but he is right: the Browns are a run-first team. Running well = better throwing o... Read more

Utilities

Map **Map**

Map button displays all current mappings of modulators, multiparameters and MIDI (whichever subsystems the plugin provides).

Mod 1 **Modulator**

Modulator button displays settings of the modulator. It also contains a checkbox, to the left, which you can use to enable or disable the modulator. Click on it using your right mouse button or use the **menu button** to display an additional menu with learning capabilities - as described below.

Menu

Menu button shows the **smart learn** menu. You can also use the right mouse button anywhere on the modulator button.

Learn activates the learning mode and displays "REC" on the button as a reminder. **Clear & Learn** deletes all parameters currently associated with the modulator, then activates the learning mode as above. After that every parameter you touch will be associated to the modulator along with the range that the parameter was changed. Learning mode is ended by clicking the button again.

In smart learn mode the modulator does not operate but rather records your actions. You can still adjust every automatable parameter and use it normally. When you change a parameter, the plugin associates that parameter with the modulator and also records the range of values that you set.

For example, to associate a frequency slider and make a modulator control it from 100Hz to 1kHz, just enable the smart learn mode, click the slider then move it from 100Hz to 1kHz (you can also edit the range later in the modulator window too). Then disable the learning mode by clicking on the button.

Menu

Menu button displays additional menu containing features for modulator presets and randomization.

Lock **Lock**

Lock button displays the settings of the global parameter lock. Click on it using your left mouse button to open the Global Parameter Lock window, listing all those parameters that are currently able to be locked.
Click on it using your right mouse button or use the **menu button** to display the menu with learning capabilities - **Learn** activates the learning mode, **Clear & Learn** deletes all currently-lockable parameters and then activates the learning mode. After that, every parameter you touch will be added to the lock. Learning mode is ended by clicking the button again.
The On/Off button built into the Lock button enables or disables the active locks.

Collapse

Collapse button minimizes or enlarges the panel to release space for other editors.

M 1 0.0 % **Multiparameter**

Multiparameter button displays settings of the multiparameter. The multiparameter value can be adjusted by dragging it or by pressing Shift and clicking it to enter a new value from the virtual keyboard or from your computer keyboard.

Click on the button using your left mouse button to open the **Multiparameter** window where all the details of the multiparameter can be set. Click on it using your right mouse button or click on the **menu button** to the right to display an additional menu with learning capabilities - as described below.

Menu

Menu button shows the **smart learn** menu. You can also use the right mouse button anywhere on the multiparameter button.

Learn attaches any parameters, including ranges. Click this, then move any parameters through the ranges that you want and click the multiparameter button again to finish. While learning is active, "REC" is displayed on the multiparameter button and learning mode is ended

by clicking the button again.

Clear & Learn clears any parameters currently in the list then attaches any parameters, including ranges. Click this, then move any parameters through the ranges that you want and click the multiparameter button again to finish. While learning is active, "REC" is displayed on the multiparameter button and learning mode is ended by clicking the button again.

Reset resets all multiparameter settings to defaults.

Quick Learn clears any parameters currently in the list, attaches one parameter, including its range and assigns its name to the multiparameter. Click this, then move one parameter through the range that you want.

Attach MIDI Controller opens the MIDI Settings window, selects a unused parameter and activates MIDI learn. Click this then move the MIDI controller that you want to assign.

Reorder to ... lets you change the order of the multiparameters. This can be useful when creating active-presets. Please note that this feature can cause problems when one multiparameter controls other multiparameters, as these associations will not be preserved and they will need to be rebuilt.

In learning mode the multiparameter does not operate but rather records your actions. You can still adjust every automatable parameter and use it normally. When you change a parameter, the plugin associates that parameter with the multiparameter and also records the range of values that you set.

For example, to associate a frequency slider and make a multiparameter control it from 100Hz to 1KHz, just enable the smart learn mode, click the slider then move it from 100Hz to 1KHz (you can also edit the range later in the Multiparameter window too). Then disable the learning mode by clicking on the button.

Collapse

Collapse button minimizes or enlarges the panel to release space for other editors.

Note-off

Note-off button enables or disables note-off processing. When disabled, MIDI note-on messages trigger particular sequences and note-offs are ignored. When enabled, note-offs are processed as well and they immediately switch to the first sequence which usually contains no processing.

Sequences panel

Sequences panel contains 3 sets (time, volume and filter) of 36 sequences. Any one can be selected quickly. Each sequence completely reloads the whole sequence graph. If you click using **left mouse button** on a sequence button, it is triggered and in immediate mode it becomes selected and the graph is reloaded. If you use **right mouse button**, a menu will be displayed providing renaming, copy & paste and system preset management.
You can also use **MIDI input** to switch between sequences. There are 36 sequences per sequence type; the time sequences are mapped to octaves 0 - 2 (C1 to B2), the volume sequences to octaves 3 - 5 (C4 to B6), and the filter sequences to octaves 6 - 8 (C7 to B9).
You can also **automate** the switching between sequences and use a **modulator** to trigger sequences automatically.

Presets

Presets button lets you save and load the whole set of 36 sequences of the selected type (time, volume or filter) to / from the plug-in's data storage area on disk. Global plugin presets (accessed via the plug-in's title bar) replace all settings in the plug-in, these presets contain only the set of sequences of the selected type. Note that time sequences are incompatible with volume and filter sequences, therefore they are placed into separate preset banks.

Left arrow

Left arrow button loads the previous preset.

Right arrow

Right arrow button loads the next preset.

Randomize

Randomize button loads a random preset.

Link

Link button enables or disables linking of the three sequences. When enabled, every time you trigger a time sequence, for example, the volume and filter sequences are triggered as well.

Collapse

Collapse button minimizes or enlarges the panel to release space for other editors.

GRIEVING DURING THE HOLIDAYS
Set realistic expectations and do not over-book yourself.
Surround yourself with people you feel safe with and loved by.
While it's okay to not go to everything, try not to isolate yourself completely.
Avoid unhealthy coping such as excessive alcohol, staying up all night, etc.
Create time to honor what you have lost.
Allow yourself the range of emotions you may be experiencing.

God meets us where we are in our processing. He is helping us navigate, He is not rushing or forcing. God then told Elijah to go back the way he came. Even if we don't respond with faith, but with fear instead, God has a process of bringing us back closer to Him. Our God is a compassionate Father, one who is patient and one who will lift our burdens and smother them with his peace:

> "But you, O Lord, are a God merciful and gracious, slow to anger and abounding in steadfast love and faithfulness." Psalm 86:15

Friends, it's not what is happening to us, but what God is doing

God's power was made perfect in

Elijah's anxiety and weakness as well, showing us that God will use us in whatever state we are in to further His glory and fulfill His plan for our life. Our inability to do things is not what God focuses on, it is our openness to Him. God will continue to work and use you, despite the conditions and storms you are enduring. Replace the anxiety with truth from God's word. God has given us His strength to crush the thoughts of fear and replace them with His abounding peace.

Here's something really important: God's good plans for us cannot and will not be thwarted by our doubts with anxiety and discouragement!

I haven't had writer's block in years. My secret to always finding the motivation and inspiration to write is:

1. Actually loving to create.
Plain and simple you gotta love what you do. Love for writing is key

2. Always change the scenery
Try writing in the house, outside, etc.

1 5

Diggz Da Prophecy @DiggzDaProphecy · 17m

3. Never force write
At times you'll get requested to do tracks. These may be paid commissions or just someone you really want to work with. If you don't like either the song itself or the beat. Then decline the collab because you will not sound like u when u force it.

1 4

Diggz Da Prophecy @DiggzDaProphecy · 17m

4. Stick to topics and subjects you know and thoroughly understand. It just makes the process a bit easier when you don't have to reach for info.

5. Don't overthink the process.
Sometimes we are our worst critics just relax and make the process as smooth as possible.

ADD CLARITY & FATNESS

The Custom Series Lift processor is a boost-only parallel filter based upon passive designs, and it can add real life and girth to your tracks.

High Lift allows the top end to be opened up in a natural way, adding air and space to the resulting sound. The Present and Silky buttons tune the shape of the high frequencies to be more or less forward without ever getting harsh or strident.

Low Lift injects natural bass energy, and it's magic on anemic bass guitars and kick drums. The Big and Punchy buttons shape the transient and low frequency information in two distinct ways, so experiment to see which works best on the -k at hand.

To me that's the beauty of music a d why I'll ways listen to different types and make different type of music.
Just cause few tracks don't vibe, dosen't mean the artist is bad or theres one track you'll eventually vibe to.

Music is amazing . Thanks @Daddyphatsnaps

Marques W and 2 others liked your reply

Way to go dude! I like my little sanctuary in progress as well.

Touring isn't for everyone and that's fine, still ways to make an impact

Much love man you living your dream, I'm not there yet but glad I took a chance to get started.

What Goes Where?

- **Startup Disk (inside your Mac) – OSX Operating System, Programs including your DAW and Plug-ins**
- **External Hard Drive – Audio files from your DAW, normally in .aiff or .wav file format**
- **Samples Drive – All your sample for any virtual instruments like Komplete or your DAW loops, again they are often in .aiff and .wav files**
- **Back Up Drive – If you stayed up all night creating something beautiful, then back it up and it goes here!**

Structure

DAWs often store your work as a **session** or **project**. You should get into the habit of backing these up when you have finished. Each session or project consists of a session or project folder, which contains the session/project file all the **audio files, arrangement data, virtual instrument** and any other **samples referenced** to create your song. **Never remove** any audio files from this folder. When creating a backup, **back up the entire folder** or your song may become corrupted.

Your DAW will allow you to set up an audio recording path. You should place your session or project audio files and all the song session data on your external hard drive. This will keep everything neatly in one place, making it easier to find and to back up. Another advantage is that, you won't fill your startup disk straight away. Audio files take up a lot of space and will fill your Mac's system drive ups very quickly.

When Oedipus reached Thebes, he encountered a Sphinx. *"If you want to pass this point alive, you must answer my riddle: What goes on four legs in the morning, on two legs at noon, and on three legs in the evening?"*, the Sphinx asked. Oedipus pondered for a moment. "Probably one of those new Pokemon", he finally replied. "There's like 600 of them, I'd be surprised if one of them DOESN'T change its number of legs whilst evolving". *"Fair enough, man"*, spoke the Sphinx. *"I can't reasonably expect you to remember all their names. You may pass."*

Next Steps

1. Determine to call and ask a brother how they are doing this week. Take the time to pray with them. Do it again next week. Determine to be an encouragement!

   Bonus: Try and have a time where you hang out with that person.

2. Think about either an area you want to grow in, what you feel like a struggle is for you, etc. What scripture could you memorize about that area?

3. Who is a person that you can love and talk about Christ with in the next two week? (Coworker, neighbor, family member, someone you see recreating)

Bioscape, Found Sound Cinematics

Field recordings merge together in a sonic kaleidoscope of found sound cinematics – from underscoring pads to drones, pulses and textures.

Bioscape is a 4.5GB Kontakt instrument that is based on field recordings and found sounds to create musical content, this gives you an unpolished, raw and organic dimension to your production.

Bioscape is particularly suitable for game and filmscore composers, but works extremely well with ambient music, music concrète, sound healing, music therapy or as a standalone experimental instrument.

Bioscape contains hundreds of field recordings and found sounds from hydrophonic desert wind to abandoned factory drones, from ghostly ringing rocks to cracking icy rivers, all sorted in different sound categories. Using the sound material, a team of world renowned sound designers have crafted over 440 presets sorted in categories from pulses to pads, textures, ASMR, drones, playables, effects and reverse.

Within the DNA of Bioscape is a multifaceted instrument that on one side can sound as atonal and dark as you want and on the other side produce the most ethereal and light timbres.

Bioscape is made for and licensed to the free Kontakt Player so you do not need the full version of Kontakt to play Bioscape. It is fully NKS compatible and supports drag & drop, so you can use your own sounds and samples. It is installed directly in Native Access, just enter the serial number and click install.
